Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 August 2009.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

This is the second Office Action **final** for serial number 10/576,016, Method For Position Indexing Of A Machine Or Similar On The Floor And Machine Leg Used Therefor, filed April 17, 2006.

Claim Objections

Claim 20 is objected to because of the following informalities: line 14, "matchews" should be changed to -- matches --. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

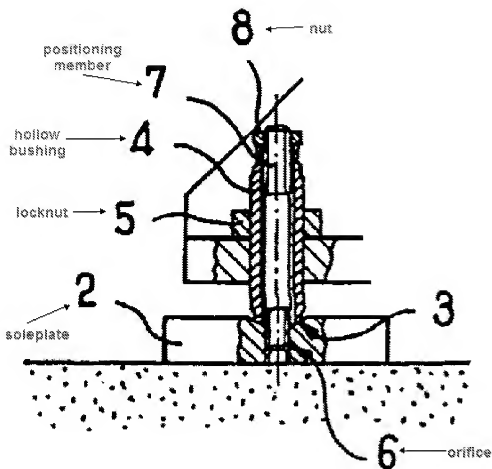

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10, 12, and 17-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Applicant Admitted Prior Art (AAPA) as identified by Figure 1 of the drawings (as shown in the marked-up below), and pages 1-2 of the specification, which the applicant submitted.

The prior art discloses a machine leg for indexing a machine in position on the ground, comprising: a hollow bushing; a soleplate forming a bottom of the bushing and having an orifice through the bottom of opening out into the bushing; a positioning member, which can be from a drilled hole in the ground; wherein the orifice is sized to

cooperate with the positioning member; the positioning member is configured to pass through the bushing along a length of the bushing and through the orifice into the drilled hole in the ground, the drilled hole in line with the orifice, thereby positioning the machine on the ground for indexing; further comprising: a nut for anchoring the bushing and wherein the positioning member is securable to the ground; and the positioning member has a threaded free end (top portion) and the nut bearing against an inside face of the bottom of the bushing; wherein a diameter of the positioning member (outer diameter) matches a diameter of the orifice (inner diameter); wherein the soleplate is fixedly secured to the hollow bushing (connected by the recess - 3); a lock nut configured to engage with an outer surface of the hollow bushing to secure the hollow bushing in position

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant Admitted Prior Art (AAPA) as shown above in Figure 1.

The prior art fails to disclose wherein the soleplate is integral with the hollow bushing. Nevertheless, it would have been obvious to one ordinary skill in the art at the time the invention was made to have modified the soleplate and the hollow bushing of the AAPA to include a single integral continuous piece because one would have motivated to provide a one piece construction for manufacturing purpose and it would be merely a matter of obvious engineering choice. *In re Larson*, 340 F.2d 965, 968, 144 USPQ 347, 349 (CCPA 1965).

Response to Arguments

Applicant's arguments filed August 13, 2009 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
